PROFESSIONAL SUMMARY

AI Engineer and Software Engineering undergraduate specializing in Generative AI, Agentic AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Semantic Search, NLP, and Intelligent Automation Systems. Creator of ReflexCube (no-code AI compiler). Experienced in building scalable, containerized backend pipelines, autonomous multi-agent environments, and low-latency vector retrieval.

EDUCATION

B.Tech in Software Engineering | KL University

Cumulative CGPA: 9.32/10.00 | Graduation: 2026 (Expected)

TECHNICAL SKILLS

AI / Machine Learning:	Generative AI, Large Language Models (LLMs), NLP, Retrieval-Augmented Generation (RAG), Semantic Search, Vector Embeddings, CNNs, Deep Learning, Computer Vision
Agentic AI & Engineering:	LangChain, LlamaIndex, Autonomous AI Agents, Multi-Agent Collaboration, Function Calling, Prompt Engineering, Tool Calling, Vector Databases (ChromaDB, Pinecone)
Languages & Frameworks:	Python, Java, C++, SQL, JavaScript, FastAPI, TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy
Backend & Infrastructure:	REST APIs, Microservices, PostgreSQL, Docker, Git, CI/CD pipelines, Linux CLI

PROFESSIONAL EXPERIENCE

AI/ML Engineering Intern | Bot Point (Present)

- Built and deployed custom AI agents handling over 1K+ daily customer queries, raising response accuracy by 30% and significantly reducing customer support latency.
- Designed workflow templates integrating prompt engineering and validation loops, automating workflows and reducing manual intervention by 40%.
- Developed and containerized microservice architectures using Python, FastAPI, and Docker for scalable production deployment.

SELECTED PROJECTS

ReflexCube — No-Code AI Application Builder | Python, FastAPI, LangChain, ChromaDB, PostgreSQL, Docker

- Developed a visual no-code builder enabling developers to construct RAG workflows and autonomous multi-agent environments via drag-and-drop interfaces.
- Designed a custom DAG (Directed Acyclic Graph) workflow compiler and execution engine to handle complex prompt chains, document ingestion, and vector retrieval.
- Implemented multi-agent collaboration rooms utilizing function-calling paradigms, enabling co-operative reasoning with cost and latency tracking.

CreditWise — Machine Learning Loan Risk Analytics | Python, Scikit-learn, Pandas, NumPy

- Engineered an automated machine learning pipeline performing feature selection and ensemble learning to forecast credit default risk with 26% accuracy improvement over baselines.

Sign Language Detection — Real-Time Computer Vision Interface | Python, OpenCV, TensorFlow, CNN

- Trained and deployed a Convolutional Neural Network (CNN) translating 30+ gesture categories in real-time with 94% validation accuracy using custom frame pre-processing pipelines.

CERTIFICATIONS & COMPETITIVE PROGRAMMING

- **SAP Generative AI Developer, Oracle OCI Architect Associate, Salesforce AI Associate** (Verified, 2025)
- Solved **700+ Data Structures & Algorithms** problems across LeetCode (bikashkh) and CodeChef (4★ rating, user: kh_bikash22).
